

Aula 006

1) JavaScript

a)

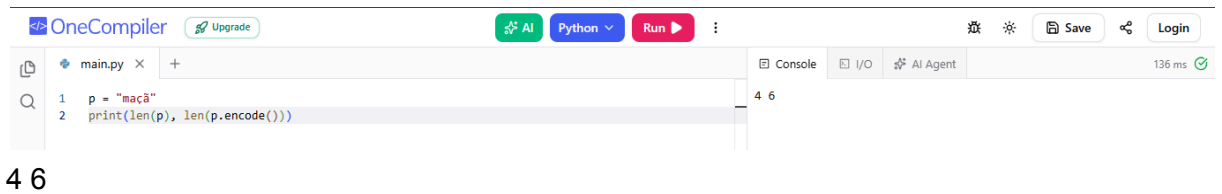

The screenshot shows the OneCompiler interface with a JavaScript file named 'index.js'. The code contains two console.log statements. The first logs the result of the comparison `0.1 * 3 === 0.3`, which is `false`. The second logs the result of `9007199254740993`, which is the number itself. The console output on the right shows `false` and `9007199254740992`.

```
1 console.log(0.1 * 3 === 0.3);  
2 console.log(9007199254740993);  
3
```

Console output:
`false`
`9007199254740992`

b) O problema é detectado na compilação.

2) a)

The screenshot shows the OneCompiler interface with a Python file named 'main.py'. The code defines a string `p = "maçã"` and prints its length and the length of its encoded version. The console output shows `4 6`. Below the screenshot, the numbers `4 6` are repeated.

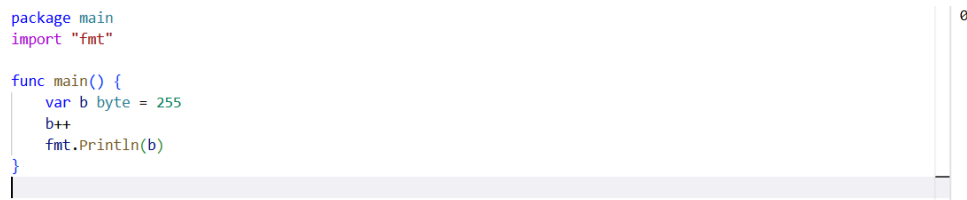

```
1 p = "maçã"  
2 print(len(p), len(p.encode()))
```

Console output: `4 6`

4 6

b) Nunca

3) a)

The screenshot shows the OneCompiler interface with a C# file named 'main.cs'. The code defines a byte variable `b` with the value 255, increments it by 1, and prints the result. The console output shows `0`.

```
package main  
import "fmt"  
  
func main() {  
    var b byte = 255  
    b++  
    fmt.Println(b)  
}
```

Console output: `0`

b) Detectado: nunca

5) a)

The screenshot shows the OneCompiler Rust IDE. The editor displays a file named `HelloWorld.rs` with the following Rust code:

```
1 fn main() {  
2     let s = String::from("oi");  
3     let t = s;  
4     println!("{}", s, t);  
5 }  
6
```

The console on the right shows a compilation error:

```
error[E0382]: borrow of moved value: `s`  
--> HelloWorld.rs:4:23  
|  
2 |     let s = String::from("oi");  
|     - move occurs because `s` has type `String`, which  
|     does not implement the `Copy` trait  
3 |     let t = s;  
|     - value moved here  
4 |     println!("{}", s, t);  
|                   ^ value borrowed here after move  
|  
help: consider cloning the value if the performance cost is  
acceptable  
3 |     let t = s.clone();  
|               +++++++  
  
error: aborting due to 1 previous error  
  
For more information about this error, try `rustc --explain E0382`.  
Debug this error
```

b) Compilação

4) Java

a)

The screenshot shows the OneCompiler Java IDE. The editor displays a file named `Main.java` with the following Java code:

```
1 int [] v = new int[3];  
2 System.out.println(v[0]);  
3 System.out.println(v[3]);
```

The console on the right shows two compilation errors:

```
Main.java:2: error: class, interface, annotation type, enum,  
record, method or field expected  
System.out.println(v[0]);  
^  
Main.java:3: error: class, interface, annotation type, enum,  
record, method or field expected  
System.out.println(v[3]);  
^  
2 errors  
Debug this error
```

b) O problema é encontrado na execução.

6)a)

The screenshot shows the OneCompiler C IDE. The editor displays a file named `Main.c` with the following C code:

```
1 #include <stdio.h>  
2 int main()  
3 {  
4     union { int i; float f; } u;  
5     u.f = 1.0f;  
6     printf("%d\n", u.i);  
7 }
```

The console on the right shows the output of the compilation:

```
1065353216
```

The status bar at the bottom right indicates the compilation was successful in 182 ms.
